Services with regard to transport and logistics offered

Summary

A company from Western Poland that possesses well-established logistics back-up facilities with good infrastructure offers services with regard to transport and logistics.

Reference BOPL20140903003

Details

Description

The company from Western Poland possesses well-established logistics back-up facilities. The complete offer comprises:

1. Warehousing space. The company has its facilities located in the very centre of one of the biggest cities in the region (very well connected with major roads in Poland and Germany). These are: store places located at a number of built-in warehouse halls with the overall area of about 47 400 m² (most of them are equipped with railway subgrades and overhead travelling cranes), roofed store places (without side walls) of the total area of c.a. 2487 m² (with the railway subgrade), stacking yards of the total area of 4920 m².
2. Access to railway siding which gives perfect transshipping possibilities (also possible with the use of the company's loading equipment such as e.g. forklift trucks). The railway siding is linked to the Polish railway lines and it ramifies in a few tracks (at the company's premises) where it is possible to unload the cars as well as to weigh them (the company possesses proper equipment).
3. Transport vehicle stock (trucks, semitrailers). The company offers own transport trucks with semitrailers which are 13,6 m long, have 24,5 t and up to 100 m³ loading capacity. The company is able to provide home and international transport services. Each vehicle is allowed to transport dangerous materials (ADR).
4. Home/international forwarding. While performing this type of services, the company wants to meet the highest client satisfaction level and because of this fact it invests in the most up-to-date software solutions enabling smooth and quick realisation of the orders.
5. Vehicle service (repairs). One of the company's division is authorised service of one of the leading truck and semitrailers manufacturers in Europe. Within its premises there is licensed Motor Vehicle Inspection Station. All of these enable and provide the most comprehensive services regarding truck repairing, servicing (within the warranty period) and inspecting.

Considering the company's offer, it looks for partners interested in any kind of logistics services. The potential partners may be investors wishing to rent/buy warehousing space but also companies willing to tranship their goods as well as transport companies wishing to repair their

stock and individual clients who want to transport their goods.

Advantages and Innovations

Apart from the infrastructure, the company possesses the necessary unloading/transhipping equipment which may be used by the potential co-operation partners. The equipment consists of: 3,5 t forklift truck, overhead travelling cranes (12) in the halls with lifting capacity from 3 to 12,5 t, 5 t gantry crane located in the stacking yard outside the buildings, 2 overhead travellers of lifting capacity 5 t and 8 t located in the railway subgrade stacking yard.

The company is a member of the biggest in Poland international forwarders association active on the market since 1957. This, together with various types of insurance ensures reliability and the highest quality of the performed services.
